Evening Brief

Date: Sunday August 19th, 2018

Weather Summary

Gusty southwest winds pick up over Nevada/Idaho into Utah Monday as another trough moves into the Northwest.

Moisture is pulled north in advance of this trough on Monday with thunderstorms returning to far northern and eastern areas Idaho/ western Wyoming, and far northeastern Utah. These thunderstorms will be a mix of wet/dry, wetter in the mountains of Idaho, drier across northeastern Utah. Otherwise, a monsoonal surge of wetter thunderstorms return to southern Nevada, the AZ Strip and Utah Tuesday through much of next week, with drier air and periods of breezy winds across much of Idaho and the western half of Nevada towards the end of the week.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light IA Attack Activity
National	5	GB New Fires and Acres: 15 fires 57.1 acres; 35,099 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been issued for North/West Nevada into Idaho and Northern Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

Widespread areas of critically dry fuels continue across the northern half of the Geographic Area, although ERCs have decreased some with the showers and thunderstorms that moved across the area yesterday. However, ERC's are still in the 80th to 95th percentile across ID/WY/Nrn NV into Nrn UT, with pockets above the 97th percentile.

Sagebrush Live Fuel Moisture levels across the northern half of the Great Basin are near or below mid-August normals, and grasses are cured in all areas. ERC's are below the 50th percentile across most of the southern third of Nevada, southern Utah, into the AZ Strip, with only a few remaining stations in the 70th-80th percentile in southern/southeast Utah, which is near record levels for this time of year in those southern areas. However, increasing moisture by midweek across southern/eastern Nevada into Utah and the AZ Strip should knock fuels down considerably.

Resources:

Aviation within the Great Basin

- 1 VLAT's, 6 LATs, 2 CL-415
- 21 SEATs, 2 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 8 Type 2 Helicopters / 6 Committed
- 20 Type 3 Helicopters

Crews Committed within the Great Basin

- 11 IHCs Committed / 0 Available
- 27 T-2 IAs Committed / 0 Available
